

StealthGuard™

Covert Video Surveillance

Keep remote assets safe and secure.

StealthGuard™ Covert Video Surveillance is a hidden, reliable, cost-effective solution for placing video surveillance anywhere it is needed. Ideal for assets that are located in remote areas and that cannot be protected by security personnel, the StealthGuard™ can efficiently combat against theft and vandalism.

Based on specific needs, the StealthGuard™ can be equipped with a variety of camera options including full color, day/night, or black/white. The system recording modes can be configured for continuous record, day/time scheduled recording, or for intelligent video applications such as sensor or motion detection recording. StealthGuard™ surveillance cameras have the option of being wireless, which allows cameras to be installed, repositioned, added, or replaced without disrupting daily activities. The StealthGuard™ has been designed to operate using 110/220volt or 12volt power supply.

StealthGuard™ can send alert notifications to designated individuals via email, cell phone, PDA, or Internet. StealthGuard™ remote surveillance videos and events can be monitored or downloaded by security personnel through the Internet, wirelessly, or directly from the unit using a USB key.

>> **Covert, hidden video surveillance**

>> **Protect remote assets**

>> **Alert notifications**

>> **Customizable for unique locations**

>> **Combat against theft, vandalism, and trespassing**
