

SceneCam™ Tripod

Portable Video Surveillance

Roving, easy-to-use, video surveillance.

SceneCam™ Tripod Mobile Video Surveillance is a reliable, cost-effective solution for placing video surveillance anywhere it is needed. Ideal for assets that are located in non-traditional locations, the SceneCam™ Tripod can efficiently combat against theft and vandalism.

Based on specific needs, the SceneCam™ Tripod can be equipped with a variety of camera options including day/night, infrared, variable zoom, and long range viewing. The tripod set-up allows for 360 degree viewing and the system includes a line-of-site, secure, transmission range of up to 15km. The SceneCam™ camera housings can be equipped to handle extreme environmental conditions using a stainless steel housing, heating and cooling sun shade options.

Up to 32 cameras can be monitored simultaneously in a central reviewing station. Once the SceneCam™ Tripod video footage is transmitted via the internet, the data can be recorded, copied to a disk or saved as JPG files for printing. Remote viewing of real time video footage is possible with an Internet connection. The SceneCam™ Tripod easily stores into a waterproof, compact Pelican™ case for quick relocation. The SceneCam™ camera can also be configured to be mounted on a vehicle for roving surveillance.
