SECURITAS USA TO USE ADVANCED DETECTION TECHNOLOGY'S PRODUCTS TO PROVIDE CUSTOMERS WITH SUPERIOR SECURITY

Two industry leaders to gain from strategic partnership, Customers win also.

Maiden, NC 15 September 2008 – Securitas Security Services USA, Inc and Advanced Detection Technology, LLC announced today the strategic partnership of the two industry leaders for the purpose of providing consumers with superior security products and services. Both companies will combine their industry knowledge and expertise to aid customers with the common goals of immediately detecting security breaches and fully protecting physical and human assets.

"Our mission is to utilize advanced technologies to provide the world's military, law enforcement, and security professionals with the tools to protect us from those who would do us harm. We are pleased that Securitas USA has chosen us to be a preferred provider of technologically advanced security products for use by their officers throughout the US. Our products will enhance the capabilities of the Securitas USA's security forces, while at the same time providing a safer work environment for the officers." - Dale Hiatt, President of Advanced Detection Technology

Advanced Detection Technology will provide Securitas world-class security technologies including its FastGate™ Handheld Access Control Solutions, LowCam™ Under Vehicle Inspection Systems, and SceneCam™ Mobile Vehicle Surveillance Systems. The new products will assist Securitas USA's security officers in their existing efforts of increasing precautionary measures while enabling clients with the ability to accurately capture, analyze, and report security data. All three technologies provide clients with the capability to check suspicious vehicles, persons of interest, or questionable activities against internal, external, or system generated databases.

Advanced Detection Technology patent-pending FastGate™ Handheld Access Control Solution allows security personnel to actively engage in the access control process by encompassing a wide variety of technologies including License Plate Recognition (LPR) software, biometrics, RFID tags, gates and other physical barriers. Securitas USA will utilize LowCam™ Under Vehicle Inspection Systems (UVIS) to provide a safe, quick, accurate and thorough method of inspecting the undercarriage of any passenger or commercial vehicle. Advanced Detection Technology's SceneCam™ Mobile will ensure the safety of Securitas USA's officers by capturing and storing up to four channels of real-time surveillance video from all exterior angles of the officers' vehicles.

"As part of our commitment to providing security solutions, and maintaining market leadership, we are dedicated to continually improving our guarding efficiencies. The Advanced Detection Technology offerings are a perfect complement to that goal. We are very excited to bring this outstanding technology as part of our service to our clients." - Bill Barthelemy, Chief Operating Officer, Securitas USA.
