

SunVeillance™

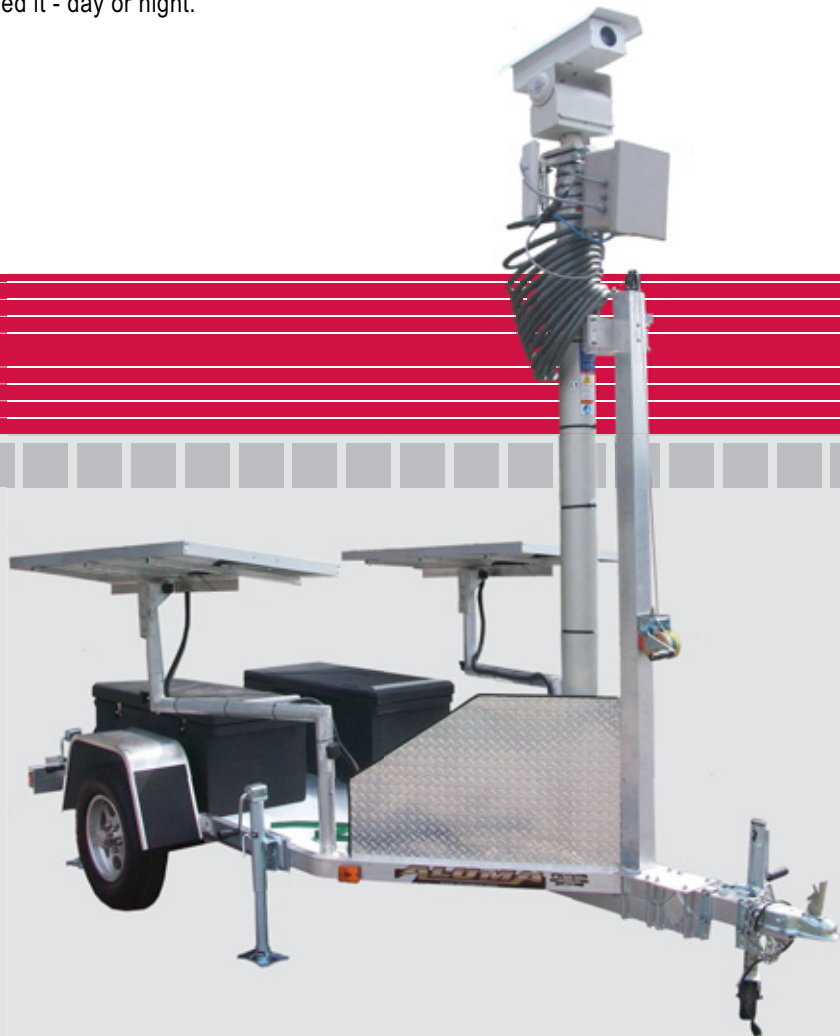

Solar Video Surveillance

Let the sun provide you with peace of mind!

SunVeillance™ wireless solar surveillance system monitors your home, business, or remote assets while conserving energy. A complete solar powered, four channel security system, SunVeillance™ consists of weather-proof surveillance cameras, video controller, solar panels, solar-charged battery, and a DVR that allows digital video capture and playback. Built-in flexibility allows for real-time video to be viewed from any location via the Internet.

SunVeillance™ can be configured as a portable system, using a pole or tripod mount, for convenient relocation. The system can also be installed as a fixed solution, using a mast, pole, building or roof mount for the protection of permanent assets. Recording modes can be configured for continuous recording, day/time scheduled recording, or for intelligent video applications such as sensor activation or motion detection recording.

SunVeillance™ has been designed to provide users with a durable, environmentally-friendly security solution that is cost-effective to own and operate. A variety of powerful long range PTZ cameras with IR, Laser IR, or thermal imaging provides the affordable and robust surveillance where you need it - day or night.
